Question:	Explain what supported your learning in this course, and provide any suggestions for change.
Response Rate:	66.67% (2 of 3)
1	The articles and video links shared by the professor were really helpful.
2	Professor Hazari and I already discussed some changes to be made to course assignments. Professor Hazari's weekly content always supported the student's understanding of the assignment. YouTube videos, Professor Hazari's input, and graphics made what was expected of each assignment easy to understand.

Question:	Comment specifically on how texts, materials, assignments, and/or activities contributed to your learning.
Response Rate:	100.00% (3 of 3)
1	This course has been one of the most significant courses I have taken in my collegiate career, where the application of each assignment can be directly translated to real-world opportunities. Public access to YouTube videos and graphics helped promote the idea that continuing to grow in the understanding and application of AI can extend outside the classroom.
2	The external resources shared on how to best utilize the different AI platforms were extremely useful. They showed the real life applicability of each platform and the best approaches to using the given platform.
3	The assignments and activities were fun and on topic

Question:	Comment specifically on the instructor's overall effectiveness in this course.
Response Rate:	100.00% (3 of 3)
1	The assignment instructions were extremely clear to understand. I appreciate the effort he put into making sure we understood everything.
2	Incredibly effective. Provided engaging feedback on every assignment and discussion post. Was always willing to have direct instruction (email, Zoom) if a student struggled on an assignment.
3	Dr. Hazari was very communicative and throughout each week engaged with the class via discussion and courseden email. I feel Dr. Hazari did an effective job leading this curriculum and this is certainly a course that should continue to be developed/offered to the UWG student body.
